CASE STUDY

81 Ravens

Achieving a fast and courteous
cross-platform anti-cheat integration
within 3 days

The client

In order to increase the number of esports players, it's necessary to expand the economic sphere surrounding the game. To this end, 81 Ravens is developing an esports game and platform that will allow anyone to organize esports competitions and allow numerous stakeholders to participate.

Bet on all esports.

Technology used

DENUVO ANTI-CHEAT

The challenge

81 Ravens has been struggling to detect and deal with cheaters in an effective and sustainable manner.

The solution

To address their concerns, 81 Ravens incorporated Denuvo Anti-Cheat for both the insight into their player base and the ability to deal with offenders.

The result

Due to the integration, 81 Ravens can detect cheaters with granular precision.

The challenge

81 Ravens needed to have the ability to detect cheaters as well as apply measures to deal with them. Ideally, they wanted to have templates that could be implemented within a short period of time and receive advice on the implementation process for anti-cheat solutions with Unreal Engine.

The solution

To address these concerns and help achieve their goal, 81 Ravens approached Denuvo by Irdeto for a solution. Ahead of the communication, Denuvo by Irdeto provided a clear explanation about what their anti-cheat tool could and could not do, a pivotal address, prior to further business discussions. Additionally, Denuvo by Irdeto provided a courteous and prompt response time, overall standing out with their hospitality.

By making it necessary to have Denuvo Anti-Cheat installed to start the game, 81 Ravens was able to prompt all their users about the adoption and has allowed them to check various key metrics, including, but not limited to the number of players, player retention and average session length on the dashboard. Prior to this integration, their statistics only showed the number of game downloads.

Due to both the speed and thoroughness of the support provided by Denuvo by Irdeto, the integration was a success.

The result

Throughout the implementation of Denuvo Anti-Cheat, 81 Ravens has been able to detect cheaters with granular precision. Additionally, as each territory releases on both Epic and Steam, Denuvo by Irdeto managed to adjust Denuvo Anti-Cheat to each environment within three days, a short turnaround time for integration.

>
> Denuvo by Irdeto's fast responses and courteous treatment, along with clear and understandable implementation instructions provided by the templates, were commendable. Due to their high level of hospitality, I would personally recommend Denuvo by Irdeto to any game developer or studio looking for an effective anti-cheat solution.
